

Terms of use of the experimental IoT network of the Eurometropolis of Strasbourg

The Eurometropolis of Strasbourg provides an IoT network (Internet of Things) freely available. This experimental network must be considered as an infrastructure meant for discovery of the technology of connected devices and be used for the development of prototypes and new services.

Use of the IoT network is strictly limited to experimental and non-commercial applications.

To use the experimental IoT network of the Eurometropolis of Strasbourg, the user must first accept these terms of use and the fair usage policy, and then register via an online form.

The user must store the data produced by these experiments on external servers; however the existing infrastructure will provide minimal hosting to create a real-life situation.

The Eurometropolis of Strasbourg cannot access data transported by the network. It commits to not claim any intellectual property rights on data. The user retains full and exclusive rights to the data produced. Users of the network have total control of the use and distribution of their data during the experiment. The Eurometropolis of Strasbourg accepts no responsibility for the use of these data.

Users of the IoT network of The Eurometropolis of Strasbourg must use it in accordance with the terms defined in this document and not for commercial purposes or in a way that may undermine people's protection.

Users are responsible for securing any authorization that may be needed for their use of the experimental IoT network of The Eurometropolis of Strasbourg. They commit to providing them in writing on demand by the Strasbourg Eurometropole.

Users must obey existing French regulations. The network cannot be used for applications which include elements that are defamatory, abusive, pornographic, racist, offensive, illegal or contrary to good morals.

The Eurometropolis of Strasbourg reserves the right to interrupt, without notice, the service of any user who does not respect these terms of use or in case of force majeure.
